

NWS Pittsburgh Radar Outage

When?

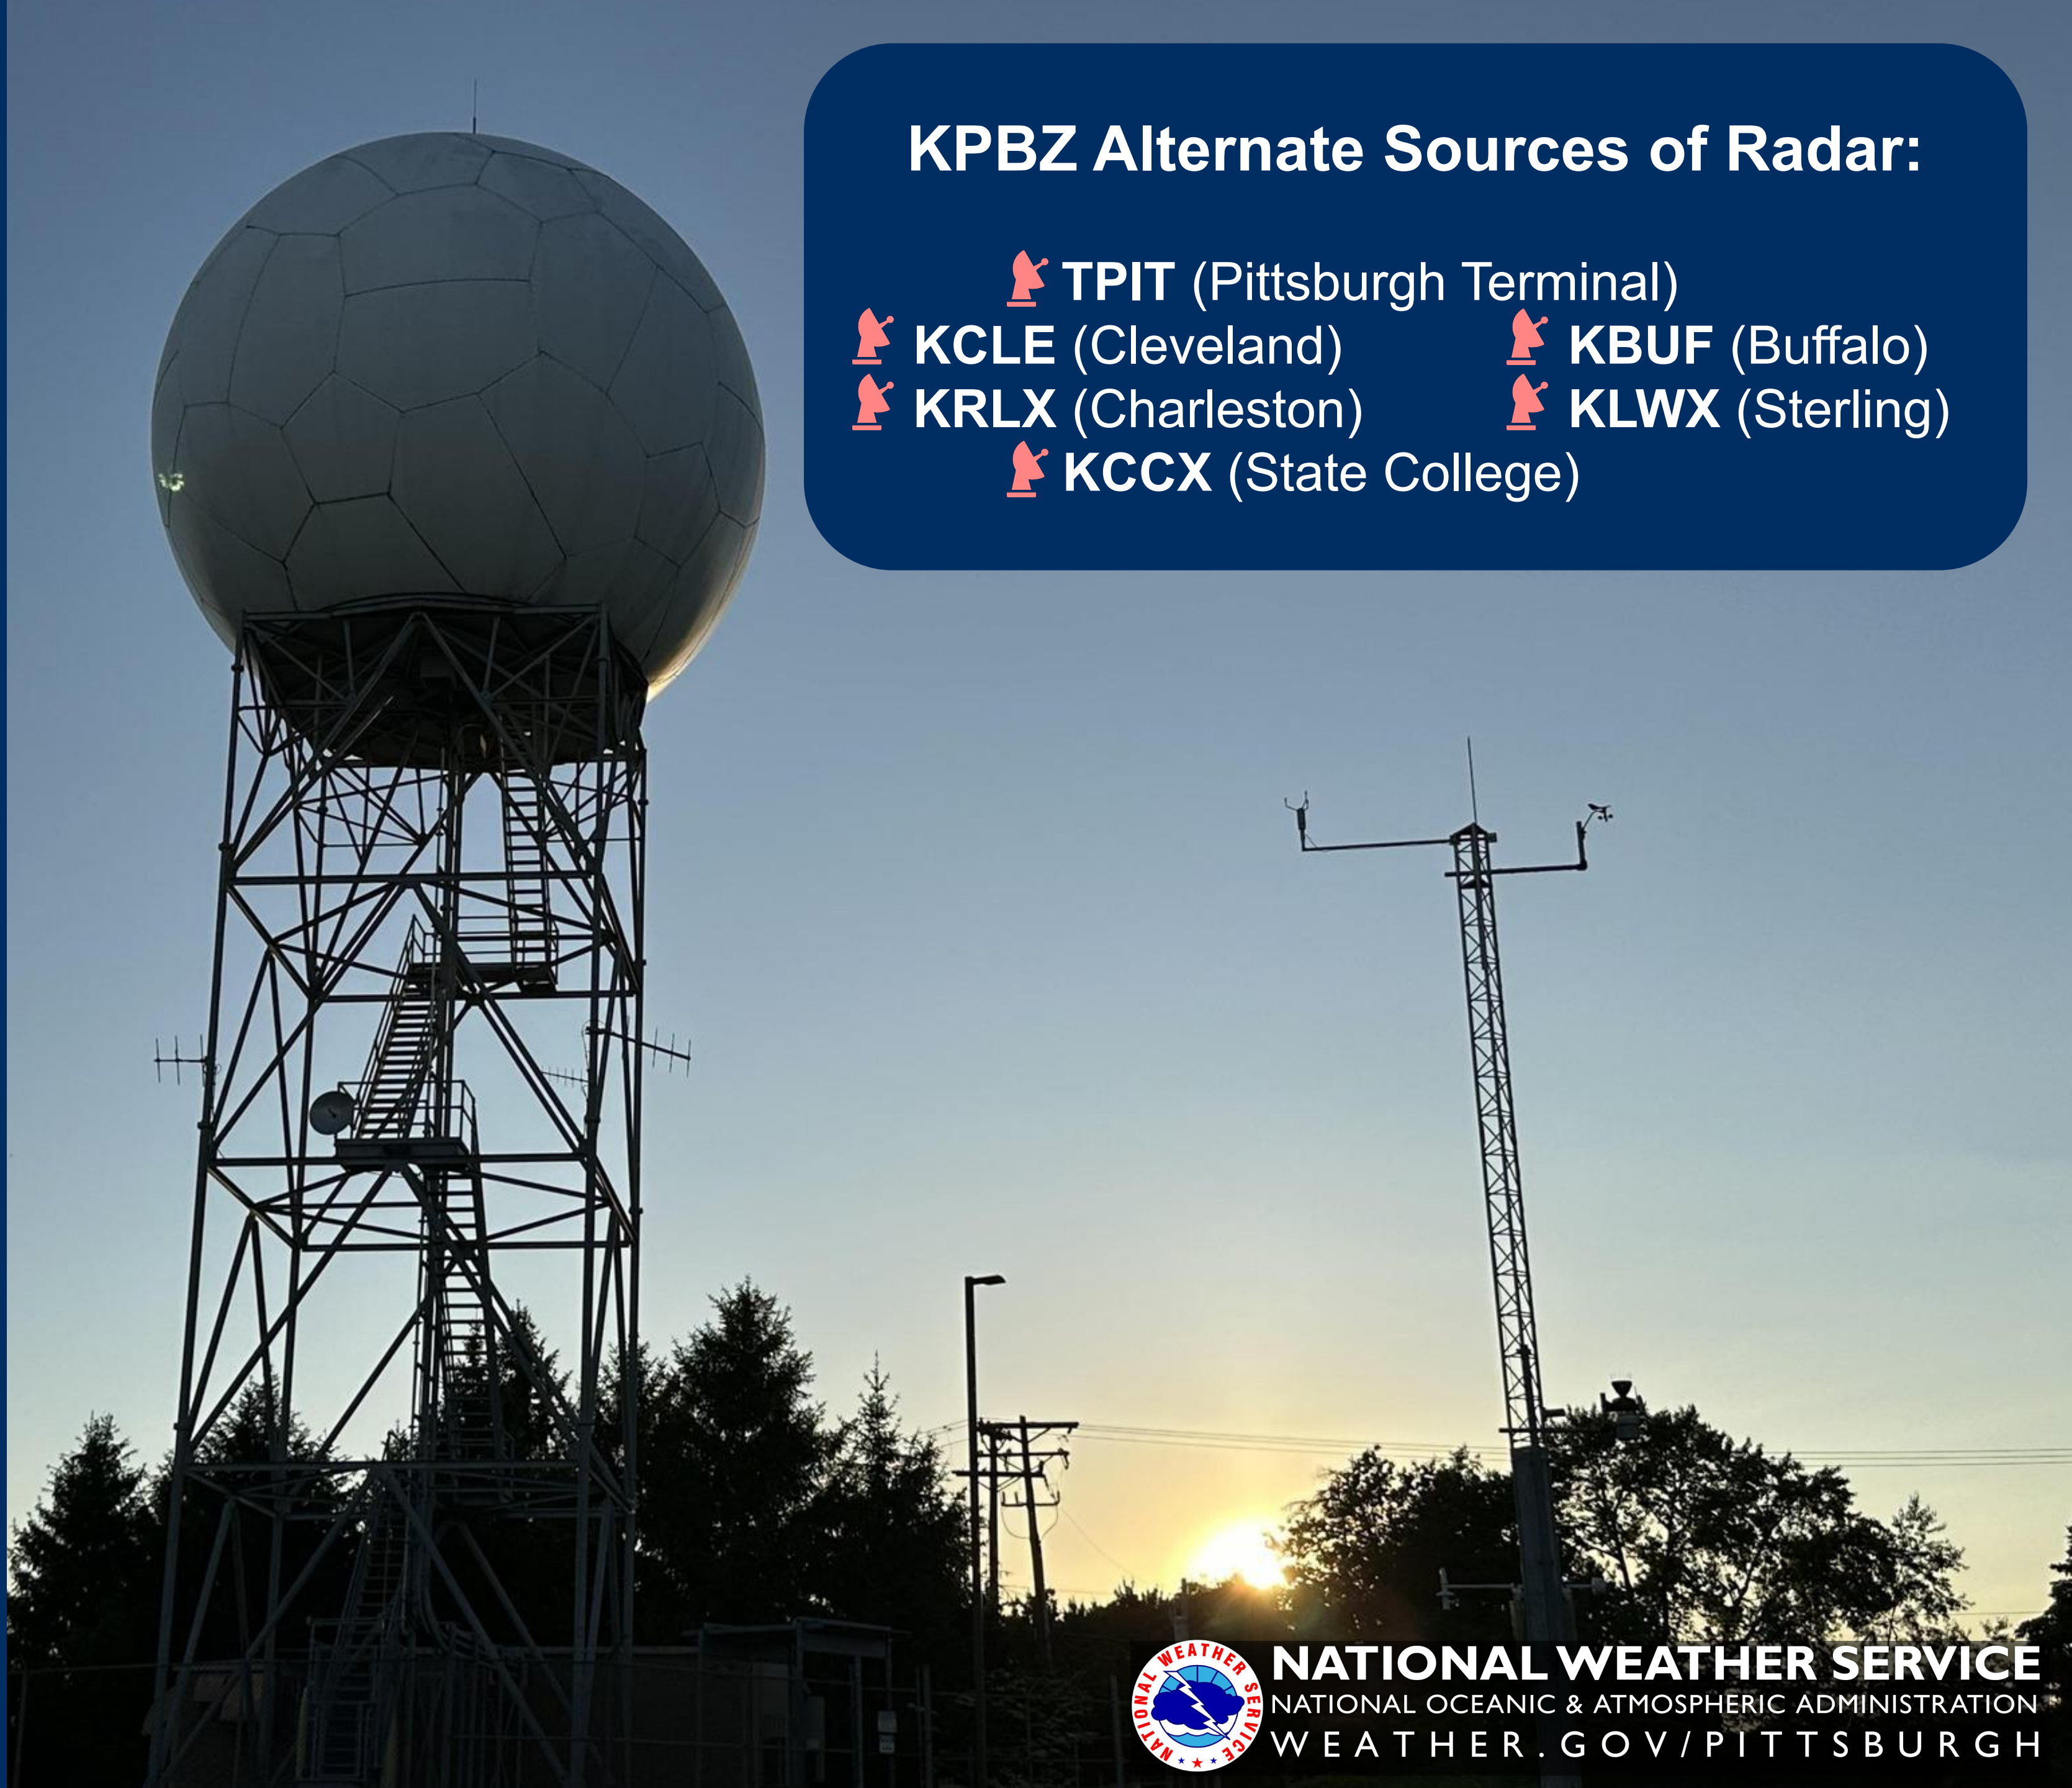

August 21st - September 4th

Why?

KPBZ will be undergoing the last phase of the Service Life Extension Program (SLEP) for WSR-88D Radars. This will ensure KPBZ will operate reliably into the 2030s!

What Happens?

During this upgrade, technicians will refurbish and replace the pedestal, which helps the radar rotate/position to capture data in all directions.

KPBZ Alternate Sources of Radar:

- TPIT (Pittsburgh Terminal)
- KCLE (Cleveland)
- KBUF (Buffalo)
- KRLX (Charleston)
- KLWX (Sterling)
- KCCX (State College)
